Exam Overview

The Alteryx Designer Core Micro-Credential: General Knowledge tests your knowledge of the basic features of Designer and your ability to apply your knowledge and use the tools to solve real-world problems. General knowledge includes Designer features such as the canvas, file formats, and workflow optimization.

AUDIENCE: Everyone with an Alteryx Community profile!

EXPERIENCE LEVEL: Intermediate

PRICE: Free

EXAM TYPE: Online, on demand

TIME ALLOTTED: 30 minutes

VERSION: The exam tests on the 22.1 version of Desktop Designer **with the AMP Engine disabled**.

ATTEMPTS: One attempt every 7 days

QUESTIONS: 20

QUESTION TYPES: Multiple-choice, matching, and multiple-response

POINT VALUES: 1 point for multiple-choice, matching, multiple-response, and practical application.

Partial credit is awarded for matching and multiple-response questions ("Select THREE options").

POLICY VIOLATIONS: You may not receive assistance from another person, allow another person to take the exam on your behalf, plagiarize any exam answers, share exam content, create more than one account for additional exam attempts, or use unauthorized publications of exam answers. Review the [Alteryx Certification Agreement and Policies](#) for more details. Policy violations will result in removal of certifications and a possible ban from the Alteryx Community.

BADGE AND CERTIFICATION: Upon exam completion, you will receive an email from our exam platform, ClassMarker, with your exam results. Within the email is a graphic to be shared online as well as a link to download the associated certificate. Once all four Core Micro-Credentials have been earned, the full Core Certification will be issued on the Alteryx Community and a virtual badge from Credly will be emailed within 72 hours.

RECERTIFICATION: The Alteryx Designer Core Micro-Certification: General Knowledge expires after 2 years. You may retake and pass the Alteryx Designer Core Micro-Credential: General Knowledge, take and pass the Alteryx Designer Core exam, OR the Alteryx Designer Advanced exam to renew your Core

General Knowledge micro-certification. After the first year of certification, you become eligible to retake the exam to recertify.

Journey to Certification Success

LEARN

1. Begin your learning journey at [Alteryx Academy](#)! Our Academy Team is constantly adding cost-free content and new methods of training to help our Designer users be confident and knowledgeable. Check out our learning paths, interactive lessons, Weekly Challenges, and more to help you learn all that Designer has to offer. In addition to free training, Alteryx now offers instructor-led training (ILT) in our Learning Marketplace at an enterprise level.
2. Analyze data that is meaningful to you. Formulate questions and build workflows that give insight into your own data. This is a critical step in the learning process—you will not only apply what you have learned, but also be able to visualize how Designer can help you perform your job more efficiently and effectively.

For a full description and examples of learning resources, see page 10.

PREPARE

1. Review the detailed exam blueprint to understand exactly what is on the exam. Identify anything you don't recognize or understand well and use your resources to learn more.
2. Review and become familiar with your resources (see page 8). These are your lifeline during the exam!
3. If you have already taken the exam, take advantage of the results email to help you pinpoint the areas where you can focus your preparation.

For more tips and tricks for exam preparation, see page 7.

1. After you select the link to take the exam, you will be directed to our exam platform ClassMarker. On the next screen you will enter your first name, last name, email address, and Community username. All users are required to agree to our [policies](#) prior to accessing the exam.
2. During the exam, you will be prompted with one question at a time. For each question, you will have the ability to do the following:
 - a. Select an answer and continue to the next question.
 - b. Not select an answer and continue to the next question.
 - c. Bookmark the question and return to it later.
3. Once you reach the last question, you will have the option to submit your answers. If you run out of time prior to submitting your answers, the exam will be submitted for you automatically.
4. You will receive your exam results immediately on your screen, and you will also receive your results via email.
5. If you do not pass on your first attempt, don't fret! You are eligible to retake the exam after 7 days, so spend that time refining your skills and becoming more familiar with your resources.

Once you have passed all our Core exams, continue your certification journey by becoming Advanced Certified, share your knowledge on the Alteryx Community, or join a user group!

Passing the exam is not the end of your certification journey—it is just the beginning of your Alteryx Designer adventure! Continue learning and take your career to new heights!

Test Tips

Read Carefully

Read each question carefully before answering. Pay close attention to tool configurations and screenshots. Just as in real life data analytics, the details matter!

Use Your Resources

Prior to beginning your exam, **have all your resources up and ready**. Use multiple screens if available and spend some time getting organized.

Pace Yourself

Allot about 75 seconds for each question. If you finish early, use the remaining time to go back and check your answers. Use the full hour.

Answer Every Question

In the exam platform, use the Bookmark feature to flag questions you would like to come back to and review later. Select **See all questions** to view all unanswered and bookmarked questions. Many questions provide partial credit, so it is worth attempting to answer every question even if you aren't 100% sure.

Reflect, Review, Refine

If you do not pass your first attempt, you now have a new study aid! Your exam results will be emailed to you with a breakdown of how you performed in each category. Take those results and use them to pinpoint your study efforts.

Exam Resources

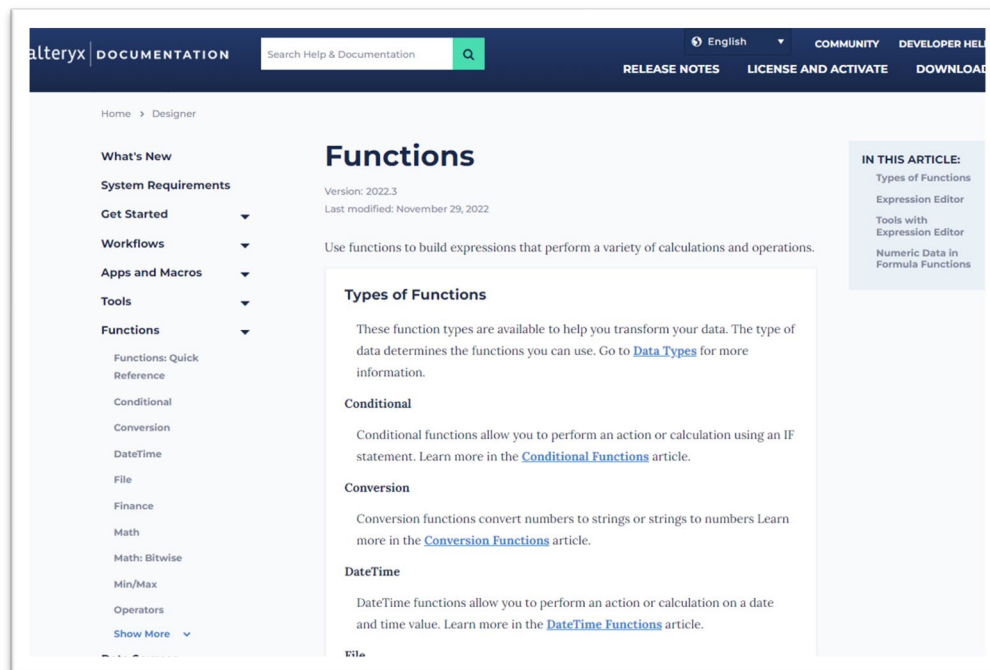

One Tool Examples

Within Designer itself, every tool has a One Tool Example. One Tool Examples are sample workflows that demonstrate different configuration options for one tool at a time. Right-click the tool for a full menu or select the tool to access the direct link to **Open Example**. Don't forget to select **Run** to check out the tool in action!

The screenshot displays the Alteryx Designer interface. On the left, the 'Canvas Options' panel is visible with settings for Layout Direction (Horizontal), Annotations (Hide), and Connection Progress (Show Only When Running). The main workspace shows a workflow diagram with two input data sources (represented by book icons) connected to a 'Join Tool' (represented by a puzzle piece icon). The 'Join Tool' is highlighted, and its documentation is displayed on the right. The documentation includes a title 'Join Tool', a description 'The Join tool combines 2 data streams based on common fields or record position. In the joined output, each row will contain the data from both inputs.', and three numbered steps: 1) Run the workflow (Ctrl+R), 2) Select a tool to view its output in the Results window, and 3) Select (L)Left unjoined, (J)Joined, (R)Right unjoined. Below the steps, three join methods are detailed: 'Join by Single Field (CustomerID)', 'Join by Multiple Fields (FirstName & LastName)', and 'Join by Record Position'. Each method includes a brief description of the output and any specific options or warnings. The bottom of the interface shows the 'Results - Workflow - Messages' panel with status indicators for All, Errors, Conv Errors, Warnings, Messages, and Files.

Help Documentation

The holy grail of information is found in our **Support > Help Documentation**. Here you will find the user manual for Designer as well as other products. The documentation includes tool descriptions, explanations of configurations, conditional functions, and so much more. To access Help Documentation from Designer, right-click any tool in the Tool Palette and select **Help**.

Alteryx Community Tool Mastery Index

The Alteryx Community is a powerhouse of information! Many blogs have been created that explain different ways to solve problems using Alteryx Designer. The Tool Mastery Series is a compilation of Knowledge Base contributions that introduce diverse working examples for Designer tools. Every Designer tool has a blog post dedicated to it with a detailed analysis of the tool.

Appendix

Alteryx Academy: The Academy Team provides training content and programs to help Alteryx Community members become accomplished and highly skilled Alteryx Designer users.

Alteryx Certification Home Page: The Certification page reflects the user's specific information; all available certifications are listed as well as FAQ and prep guides.

Alteryx Support: The team within Alteryx that provides Standard, Advanced, and Premium levels of support to the Alteryx Community. Users are able to submit a case, read articles, and access helpful documentation at no cost.

Certification: Achievement earned by an individual to verify their legitimacy and competence to perform a job. A certification from Alteryx refers to a passing score on one of the full certification exams.

Credly: Well-known digital badge management software. Every certification within our portfolio has a Credly badge associated with it that can be shared virtually. Credly is also the home of our PDF certificates.

Micro-Certification: Achievement earned by an individual to verify their legitimacy and competence to perform a job. A micro-certification from Alteryx refers to a passing score on one of the smaller certification exams.

Open Book: The exam is not proctored, and test takers are allowed to use training, notes, and resources listed in this prep guide.

Question Types: The exam includes multiple-choice, multiple-response, matching, and practical application questions. The questions in the practical application section gauge your ability to use the tools to solve problems. Practical application questions require you to connect to a provided dataset in Alteryx Designer to solve the problem.
